

# Product Development

Scandvik's **Pull Out Shower Mixers** have been redesigned to facilitate *easier installation and fewer parts*. The incoming hot and cold supply lines are now flexible/removable and covered in braided stainless steel. The end fittings have also been converted to a standard 1/2" NPT, which does away with the old included adapter. In addition the hollow mounting thru bolt has been replaced by a mounting kit. The new, redesigned products have been assigned new part numbers to minimize confusion when ordering replacement parts, please see chart below.

## Redesigned Shower Mixer Body

**Mounting kit** includes both O'rings, mounting C-washer, mounting nut, gasket and hose coupling. #17075

## SHOWER MIXER RANGE

### Trigger Handle

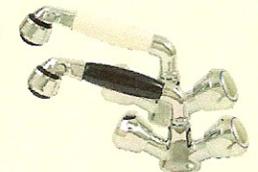

### Euro Handle

### Adjustable Spray Aerator Handle

### Water Conservation Valve Handle
